Subject: Acquisition of book "BandhkamKeshetrachi Garudzep" by Prakash Medhekar

Respected sir,

A request for acquiring the copies of publication on Civil Engineering have been received from the Head of Department, Civil on 18th May 2023. While checking the title, it has been observed that the title is not available in our library holdings. This book is beneficial as it gives information about advanced technologies in construction. This book is extensively used by civil engineering students, college staff members, and visitors.

It may be observed from the book price of Rs. 250.00. After deduction publisher's special discount of 25% Rs. 187.50 would be required for acquiring one copy of the suggested Title. The total cost involved in the procurement of ten copies is Rs. 1875.00.

In the light of the above, it is proposed that Rs.1,875.00 (Rupees One Thousand Eight hundred and Seventy-Five only) may please be allocated for acquiring the 10 (Ten) copies of the requested publication.

Submitted for your approval & guidance Please.

Principal
DVVP, College of Engineering,
Ahmednagar

Subject: Acquisition of book on Civil Engineering

Respected sir,

As per your guidance, central Library has purchased two books on construction management for our civil engineering students, those books are available in Marathi languages. The books explain various concepts in construction management that are helpful to our civil engineering students.

1. Bilding bandhakam v dekharekh practical Handbook Vol. 1 by Pramod Berry
2. Bilding bandhakam v dekharekh practical Handbook Vol. 2 by Pramod Berry

It may be observed from the book price of Rs.750 for each title and the additional transpiration charges of Rs.450.00. The total cost of procurement of two books is Rs.1950.00

In the light of the above, it is proposed that Rs.1950.00 (One Thousand Nine Hundred and Fifty only) may please be allocated for acquiring of the requested publication.

Submitted for your approval & guidance Please.

Subject: Acquisition of books on Computer Engineering and IT

Respected sir,

A request for acquiring copies of the publication titled " Deep Learning: a Practitioner's Approach" by Josh Patterson and Adam Gibson, 1st Ed., 2017 has been received from the Head of Department, Information Technology on 11th September 2023. While checking the titles, it has been observed that the recommended titles are not available in library-ready stock. Recommended books are extensively used by our B.E. final-year students. The book prices observed in the online price list from Amazon.in. The net payable cost of Rs.4,100.00 would be required to acquire two copies of the requested titles.

In the light of the above, it is proposed that Rs. 4,100.00 (Rupees Four Thousand One Hundred only) may please be allocated for acquiring the requested publications.

Submitted for your approval & guidance Please.

Although interest in machine learning has reached a high point, lofty expectations often scuttle projects before they get very far. How can machine learning—especially deep neural networks—make a real difference in your organization? This hands-on guide not only provides the most practical information available on the subject, but also helps

Subject: Need Handcopies books of B.E.-CIT,
Subject "Deep Learning".

Respected sir,

As per above subject, Deep Learning is new subject introduced in Pattern 2019 in B.E.-CIT syllabus, having 100 marks Theory & Practical examination also, so, need to purchase handcopies of book (textbooks)

All 3 textbooks mentioned in syllabus worth (1) 2050/- (2) 5,865/- (Amazon Prices) (2) 6,500/-.

Kindly, allow ~~us~~ to purchase some copies of these books. (syllabus copy attached with it).

Thanking you,

Subject: Settlement of payment the books acquisition.

Respected Sir,

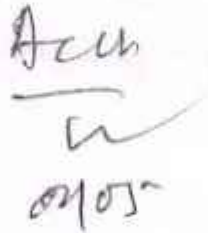

The reference to the above-stated subject, our purchase order no. DVVPFA/PS/COE.Lib./2023-24/363/285 dated 26/02/2024 to M/s. Yash books, Pune for supply of copies of books. As per the purchase order we have received books and a copy of bill for making payment. The received bill checked in the Central Library we found in the supplier demanding extra delivery charges Rs.600.

The total increased amount Rs.600.00 for the settlement of payment of above stated books procurement. Hence it is requested that the permission may please be granted for purchase of the books.

Thanking you,

Yours faithfully,

Subject: Acquisition of publications on engineering science

Respected Sir,

The reference to the above-stated subject, our purchase order no. DVVPFA/PS/COE.Lib/2023-24/361/287 dated 26/02/2024 to M/s. Vikas book distributors, Pune for supply of copies of books. As per the purchase order we have received books and a copy of bill for making payment. The received bill checked in the Central Library we found some titles price are increased comparative to purchase order. We had contacted the vendor they send justification of proof increased books price. The following titles are price increased

Sr. No.	Bill Sr. No.	Author	Title	P O price	Bill price	Increase amount	No. of copies	Total amount
1.	03	Garg Vijay	Wireless Communications and Networking	507.00	565.50	58.50	2	117.00
2.	05	Jain R.K	Engineering Metrology	511.00	616.00	105.00	1	105.00
3.	13	Ramesh Sharda : Delen Dursun	Business Intelligence and Analytics: Systems for Decision Support	663.00	729.00	66.00	2	132.00
4.	14	Srinivasan A	Cloud Computing: A Practical Approach for Learning and Implementation	429.00	429.00	31.00	1	31.00
5.	15	Maarten VS. Tanenbaum A	Distributed Systems	671.00	717.50	46.50	2	93.00
6.	16	Rastogi S.C	Bioinformatics-Methods & Application Genomics, Proteomics	897.00	932.00	35.00	2	70.00
7.	17	Gupta Prem Kumar	Problems in Operations Research: Principles and Solutions	540.00	796.00	256.00	1	256.00
8.	19	Ayrelie geron	Hands-On Machine Learning with Scikit-Learn, Keras, and Tensor Flow: Concepts, Tools, and Techniques to Build Intelligent Systems.	2550.00	2762.00	212.00	1	212.00
9.	21	William D. Callister	Materials Science and Engineering an Introduction	810.00	865.00	55.00	1	55.00
Total							13	1071.00

The total increased amount Rs.1071.00 for the settlement of payment of above stated books procurement. Hence it is requested that the permission may please be granted for purchase of the books.

Thanking you,

Yours faithfully,

WIRELESS NETWORKING

WIRELESS COMMUNICATIONS and NETWORKING

Vijay K. Garg, University of Illinois at Chicago

This book provides comprehensive theoretical and practical coverage of wireless data communications and networking. Diverse audiences including managers, practicing engineers, and students will find all the details needed for development, design, and implementation of wireless technology.

Fundamental concepts essential to full command of advanced topics are detailed and established in the first portion of the book. This firm base of knowledge is crucial to understanding discussions in later chapters concerning Wireless Personal Area Networks (WPANs), Wireless Local Area Networks (WLANs), Wireless Metro Area Networks (WMANs), Wireless Wide Area Networks (WWANs), and internetworking between WLANs and WWANs. Additional chapters deal with other aspects of wireless communications and networking such as mobility management, security, and network planning, and the future of 4G systems.

Features

- Includes cutting-edge information on the technology that connects hand-held devices, cell phones, and other mobile devices
- Numerous solved examples unite theoretical concepts with real-world applications
- End-of-chapter exercises aid the reader in continued learning
- Industry standards are specified including 3GPP, 3GPP2, 802.11, 802.15, and 802.16
- Perfect for independent study or first year graduate courses in electrical and computer engineering or computer science

About the Author

Vijay K. Garg has been a professor in the Electrical and Computer Engineering Department of the University of Illinois at Chicago since 1999, where he teaches graduate courses in Wireless Communications and Networking. Dr. Garg was a Distinguished Member of Technical Staff at Bell Laboratories Bell Labs in Naperville, Illinois from 1985 to 2001. He received his Ph.D. from the Illinois Institute of Technology, Chicago, IL in 1973 and his MS degree from the University of California at Berkeley, CA in 1966. He is a Fellow of ASCE and ASME, and a Senior Member of IEEE. Dr. Garg is a registered Professional Engineer in the state of Maine and Illinois. He is an Academic Member of the Russian Academy of Transport. Dr. Garg was a Feature Editor of the Wireless/PCS Series in IEEE Communication Magazine from 1996-2001.

This book has been authorized by Elsevier for sale in the following countries: Bangladesh, Bhutan, Maldives, Nepal, Pakistan and Sri Lanka. Sale and distribution of this book outside these countries is not authorized and is illegal.

Preface

This book deals with the automatic and precision machines which depend for their operation on sophisticated instruments capable of giving accurate measurements. Aspects on Calibration, Accreditation, traceability, globalization of trade etc. have been covered thoroughly along with latest trends on metrological aspects, particularly the role of computers and microprocessors. Numerical and problems play an important role in clarifying the text and accordingly a large number of solved problems have been added. This book also covers indepth topics on Quality Control & Assurance, Total Quality Management and ISO Series. This book is being presented in line with latest practices and trends in the industry; also the syllabus of all the engineering colleges have been kept in view while writing this revised edition.

Table of Contents

Table of Contents * Introduction * Linear Measurements * Standards of Measurements * Limits, Fits and G * Measurement by Light-Wave Interference * Straightness, Flatness, Squareness, Parallelism, Circularity and Roundness * Angular Measurements and Circular Division * Miscellaneous Measurements * Testing and Calibration of Gauges and

BUSINESS INTELLIGENCE AND ANALYTICS

SYSTEMS FOR DECISION SUPPORT

M TURBAN | RAMESH SHARDA | DURSUN DELEN

Business Intelligence and Analytics Systems 10e provides the comprehensive, up-to-date guide to today's revolutionary management support system technologies, and showcases how they are used for better decision-making. The 10th edition focuses on Business Intelligence (BI) and analytics for enterprise decision support in a streamlined book. In addition to traditional decision support systems, this edition expands the reader's understanding of the types of analytics by providing examples, products, services, and case studies by discussing Web-related issues throughout the text.

Production of management support systems (MSS) technologies
Extensive supply chain and ERP coverage.

Comprehensive coverage of data warehousing.

Organizational and societal impacts.

Updated coverage of implementation and integration.

CLOUD COMPUTING

A practical approach for
learning and implementation

A. Srinivasan | J. Suresh

This book lays a good foundation to the core concepts and principles of cloud computing, walking the reader through the fundamental ideas with expert ease. The book advances on the topics in a step-by-step manner and reinforces theory with a well-fledged pedagogy designed to enhance students' understanding and offer them practical insight into the subject.

Student friendly and easy to understand

Fourteen case studies devoted to showcase the implementation of the cloud

Provides pertinent insights into the future applications of the cloud

In-depth analysis of service-oriented architecture in explicit text spanning three chapters

Over 630 exercises

A. Srinivasan is Senior Professor and Head, Department of Information Technology, NM Jain Engineering College, Chennai. He has over 30 years of teaching experience.

J. Suresh Jagannathan is Associate Professor, Department of Computer Science, NM Jain College of Engineering, Chennai.

Fifth Edition

BIOINFORMATICS

Methods and Applications

Genomics, Proteomics and Drug Discovery

S.C. Rastogi • P. Rastogi • N. Mendiratta

Designed as a comprehensive text for students and professionals pursuing careers in the fields of bioinformatics, molecular biology, pharmacy and drug research, the Fifth Edition continues to offer a fascinating and authoritative treatment of the entire spectrum of bioinformatics, covering a wide range of high-throughput technologies. The content can be used for four core courses: bioinformatics fundamentals, genomics, proteomics and drug discovery and design.

The Fifth Edition takes a completely new pedagogical approach and the book is divided into eight distinct Units for the ease of learning: Bioinformatics Fundamentals, Sequence Alignment, Phylogenetic Analysis, Genomics, Protein Structure and Function, Drug Discovery Methods, Drug Design and Development and Integrative Topics. Accordingly, all the chapters are revised and updated in the new edition, besides introduction of **seven new chapters** and another **seven completely re-written chapters**.

As a student-friendly text, it embodies several pedagogical features such as detailed examples, numerous tables, a large number of diagrams, flow charts and web resources. The book in its present edition should prove an invaluable asset to the students and researchers in the fields of bioinformatics, biotechnology, computer-aided drug design, information technology, medical diagnostics, molecular biology and pharmaceutical sciences.

NEW TO THE FIFTH EDITION

- Re-written chapters — Biological database search and data retrieval, Pair-wise alignment of sequences, PSSMs and Hidden Markov Models, Gene Mapping, Gene Prediction, Protein Structure Overview and Protein Structure Prediction.

Inclusion of new chapters—Scoring Matrices, Gene Regulatory Elements Prediction,

Comparative Genomics, Protein Structure Databases, Protein Function Prediction, Potential Drug Targets.

KEY FEATURES

- Covers the field of bioinformatics in a complete integrated approach — moving from fundamentals to theory and practical applications.
- State-of-the-art technologies for gene identification, molecular modeling and monitoring of processes.
- Data mining, data curation and analysis, classification, interpretation and efficient storage and determination of genomes and proteomes.
- Companion website provides useful resources for the teachers as well as for the students. So, visit Learning Centre <http://www.phindia.com/bioinformatics> to have access of lecture notes, solutions manual, MCQs, problems for practice, glossary of important terms, etc.

THE AUTHORS

S.C. RASTOGI, Ph.D., has been Professor and Head, Biological Sciences Group at Birla Institute of Technology and Science (BITS), Pilani, where he has worked for 38 years. An author of more than 10 books in molecular biology, biochemistry, and bioinformatics, his particular area of expertise has been research in computer applications in molecular biology and biotechnology.

PARAG RASTOGI, M.Sc. from BITS, Pilani, and B.Tech. from XLRI, Jamshedpur, has worked in industry in various capacities in consulting and biotechnology development. He has over 25 years of industry experience and research. He has several publications to his credit and has published International Journal of Bioinformatics, Springer Nature, Emerald Publishing, Business Press, Premier Press and CBS Publishers.

NAMITA MENDIRATTA, M.A. from BITS, Pilani, has worked extensively on large bioinformatics databases. She has over 30 years of experience in IT industry and has been in leadership positions with several organizations of repute. She has also been a Visiting Professor at reputed institutes.

1195.00

www.phindia.com

Operations Research

7e

Comprehensively written in a manner that suites the students of Mechanical Engineering and Commerce & Management, "Operations Research" transmutes into a resource or a reference text for the students of statistics and mathematics aspirants of various entrance examinations including UPSC.

Coverage of popular topics such as Linear Programming, Probability Theory and Queuing Models are supplemented with numerous examples, tables and figures which are then followed by exercises thereby providing the assurance to fulfil every requirement of understanding of the student.

A book which has seen, foreseen and incorporated changes in the subject for more than 40 years, it continues to be one of the most sought after texts by the students.

Selling Features

- 16 chapters succinctly cover every crucial concept of the subject.
- Close to 2300 examples, figures and tables aid to the concepts explained.
- 1200+ exercise questions enhance the practice quotient of the book.

O'REILLY

Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow

Through a recent series of breakthroughs, deep learning has boosted the entire field of machine learning. Now, even programmers who know close to nothing about this technology can use simple, efficient tools to implement programs capable of learning from data. This bestselling book uses concrete examples, minimal theory, and production-ready Python frameworks (Scikit-Learn, Keras, and TensorFlow) to help you gain an intuitive understanding of the concepts and tools for building intelligent systems.

With this updated third edition, author Aurélien Géron explores a range of techniques, starting with simple linear regression and progressing to deep neural networks. Numerous code examples and exercises throughout the book help you apply what you've learned. Programming experience is all you need to get started.

- Use Scikit-Learn to track an example ML project end to end
- Explore several models, including support vector machines, decision trees, random forests, and ensemble methods
- Exploit unsupervised learning techniques such as dimensionality reduction, clustering, and anomaly detection

Dive into neural net architectures, including convolutional nets, recurrent nets, generative adversarial networks, autoencoders, diffusion models, and transformers

Use TensorFlow and Keras to build and train neural nets for computer vision, natural language processing, generative models, and deep reinforcement learning

Aurélien Géron is a machine learning consultant. A former Googler, he led YouTube's video classification team from 2013 to 2016. He was a founder and CTO of Wifirst from 2002 to 2012, a leading wireless firm in France, and a founder and CTO of Polyconseil in 2001, a telecom consulting firm.

"An exceptional resource to study machine learning. You will find clear-minded, intuitive explanations, and a wealth of practical tips."

—François Chollet
Author of Keras, author of
Deep Learning with Python

"This book is a great introduction to the theory and practice of solving problems with neural networks; I recommend it to anyone interested in learning about practical ML."

—Pete Warden
Mobile Lead for TensorFlow

About this Edition

Building on the success of previous edition, this edition of the book continues to provide engineers with a strong understanding of the three primary types of materials and composites, as well as the relationships that exist between the structural elements of materials and their properties. With improved and more interactive learning modules, this book provides a better visualization of the concepts.

Highlights of the Book

- It synchronizes contents with the sequence of topics taught in materials science and engineering courses in most universities in South Asia.
- "Materials of Importance" pieces in most chapters provide relevance to the subject material.
- Updated discussions on metals, ceramics and polymers.
- Concept check questions provided that test conceptual understanding.
- It integrates numerous examples throughout the chapters that show how the material is applied in the real world.
- Five appendices provide detailed material properties and the book can serve as a reference text book for practicing engineers.

CD-ROM packaged with the book contains:

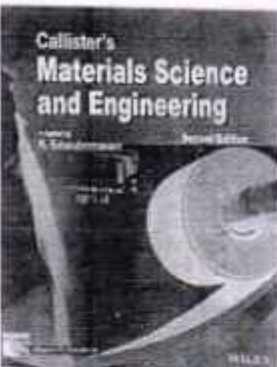

- The Virtual Materials Science and Engineering (VMSE) software program, which consists of interactive simulations and animations that enhance learning of key concepts.
- Chapters 19-23 (pp. 718-864) are contained in the CD for interested readers.
- Answers to concept check questions.
- Solutions to selected problems.

This book continues to provide engineers with a strong understanding of the three primary types of materials and composites, as well as the relationships that exist between the structural elements of materials and their properties. The relationships among processing, structure, properties and performance components for steels, glass-ceramics, polymer fibers and silicon semiconductors are explored throughout the chapters. The discussion of the construction of crystallographic directions in hexagonal unit cells is expanded. At the end of each chapter, engineers will also find revised summaries and new equation summaries to reexamine key concepts.
