CCTV INSTALLATION TECHNICIAN

CURRICULUM / SYLLABUS

This course encompasses 4 out of 4 National Occupational Standards (NOS) of "CCTV INSTALLATION Technician" Qualification Pack issued by "Electronic Sector Skill Council".

Program Name	CCTV INSTALLATION Technician		
Qualification Pack Name & Reference ID.	ELE/Q4605 VERSION 1.0		
Version No.	1.0	Version Update Date	12-May-2017
Pre-requisites to Training	10 th Standard Pass		
Training Outcomes	After completing this programme, participants will be able to: • Interact with the customer in order to identify and understand their requirements. • Ensure customer satisfaction • Install and Repair dysfunctional system. • Identify dysfunctional components through visual inspection and by use of multimeter • To understand CCTV camera installation requirement in terms of equipment, system, tools, applications appropriate for a particular site. • Select Suitable cameras & DVR to provide the better solution to the customers. • Read and Comprehend signs, labels and warning • Communicate effectively • Follow behaviour etiquettes while interacting with others • Establishing good working relationships with colleagues within and outside the department by coordinating

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	Basics of Security Surveillance Theory Duration (hh:mm) 16 :00 Practical Duration (hh:mm) 16 :00 Corresponding NOS Code ELE/N4611	Understand the surveillance system. • Knowledge of pro's & con's of surveillance. • Explain the facts of video surveillance • Explain and construct various nodes of CCTV surveillance system	•
2	Functions of Video Surveillance Theory Duration (hh:mm) 16 :00 Practical Duration (hh:mm) 16 :00 Corresponding NOS Code ELE/N4611	• Constructing of a video surveillance system. • Explain function of blocks and equipment required to implement a video surveillance system. • Understanding the facts about CCTV and its interfacing devices	• Camera. • DVR. • Cables • Adapter • Display device.
3	Types of Cameras and their functions Theory Duration (hh:mm) 16 :00 Practical Duration (hh:mm) 16 :00 Corresponding NOS Code ELE/N4611	• Understanding the various types of camera and their functionality. • Reassembling the camera & exam the parts of camera to understand their mechanism. • Selecting suitable camera after understanding	• Camera(diff. types). i. CCTV cameras ii. Analog Camera iii. HD Camera iv. IP Cameras v. Dome vi. bullet vii. IR viii. IR array ix. Vandal Proof x. Vari-focal xi. Box camera xii. Wifi camera xiii. PTZ • DVR. • Cable • Screw driver set • Display.
4	Sensors, Light, Lens(and selection) and About Zoom Theory Duration (hh:mm)	• Different types of lens and their utility. • Differentiate & select the best camera from the same group depending on the image quality being measured by TVL chart.	• Lenses(diff. types). • Screw driver set • Camera • DVR

 Dr. Vimalrao Vikhe Patil
 College of Engineering
 Ahmednagar

	16 :00 Practical Duration (hh:mm) 16 :00 Corresponding NOS Code ELE/N4610	• Selecting a camera for higher security application. • About Illumination & it's functionality • Different types of zoom technologies & their utility to get a better output in surveillance. • Angle of view settings • Selecting the proper lenses will give you a quality output.	
5	DVR and Switcher Theory Duration (hh:mm) 17:00 Practical Duration (hh:mm) 17 :00 Corresponding NOS Code ELE/N4611	• DVR as interface to view and record the image transmitted by a camera. • Explain the function of various blocks of DVR. • Understand the recording format of a DVR. • Enabling and disabling the features of a DVR depending on the level of surveillance and customer requirement. • Sequential switcher Matrix switcher • Automatic Sequential Switcher switches the images at specified intervals.	• Customer Application Form • Feedback Form • Packages Form • Props depending on Activity • Videos • Powerpoint • Laptop • Projector • Projector Screen • White Board • Marker
6	Principles of Network Remote Accessing Theory Duration (hh:mm) 17 :00 Practical Duration (hh:mm) 17 :00 Corresponding NOS Code ELE/N4611 ELE/N4610 ELE/N4609	• Explain the nodes for remote access of a CCTV camera / DVR • Configuring the DVR with Different type of router configuration ◦ Connection setup ◦ Confirming the Connection. ◦ Connecting DVR to the router ◦ Port Forwarding guide by router ◦ Eg. D-Link, Net gear , Linksys • DVR DDNS Configuration	• DVR. • Camera • Cable • LAN connection/Modem. • Laptop • Display
7	Install the CCTV Camera Theory Duration (hh:mm) 17 :00 Practical Duration (hh:mm) 17 :00 Corresponding NOS Code ELE/N4610	• To understand the warranty associated with the hardware product • To know related documents for the hardware equipments • To know company's policy on product's warranty and other terms and conditions • To know company's customer support and service policy • To know camera specifications such as focus, lens type, zoom • To check the hardware equipments before taking to the installation site • To replace the hardware if there is any issue or malfunction is found while testing	• Practical Lab a. Computer b. LCD display c. White board d. Marker e. Tool Kit for installing camera f. Installation manual g. Safety precaution manual h. Hardware equipment • Cables a. co-axial(3+1 cable) b. twisted pair (CAT 6) c. Routers d. Switchers • connectors a. BNC

PRINCIPAL
 Dr. Vithalrao Vikhe Patil
 College of Engineering
 Ahmednagar

- To Know different types of electronic surveillance products and functionalities
- To read the standard operating procedures for different equipment
- To Know elements of CCTV systems such as camera, DVR, monitor
- To check for critical equipment such as camera, recorder w.r.t quality and output
- To ensure all the tools, equipments, utilities are available in good to enable installing in single visit
- To know specification and the procedures to be followed for setting up the system
- To know functions of electrical and mechanical parts or modules
- To know power requirement of different CCTV related equipment
- To use BNC connectors for joining cables and crimp them
- To connect all the cables from multiple cameras to the CCTV system area
- To know installation procedures given in the manuals• To use power cable of specified thickness to connect CCTV system with power supply
- To know basic electronics involved in the hardware
- To know voltage and power requirement for different hardware devices
- To know voltage requirement and other specification on CCTV hardware
- To mount the CCTV camera so as to cover maximum area
- To decide whether the camera requires any enclosure to protect from dust, vandalism and climatic conditions
- To know camera specifications such as focus, lens type, zoom
- To know controls of different options in camera such as rotation, speed of movement in pan / tilt camera
- To use stable mounting structure and ensure that is not disturbed by wind or rain which would affect the video quality
- To decide on the height of camera installation according to the end purpose (for example: if the visitor entering the premise is to be

- b. Power pin
- c. RJ-45 jacks

monitored, camera should not be placed too high and their face would not be captured)

- To set up the type of camera such as pan, tilt, zoom unit as per customer requirement
- To set camera controls
- To connect the power and video output cable to the camera
- To use tools such as diagonal cutters, screwdrivers, crimp tools, knife for cabling and camera mounting
- To use recommended tools for specific equipment to avoid damage
- To know functions of electrical and mechanical parts or modules
- To know how to operate the system and other hardware
- To follow standard operating procedure of tools and equipments and avoid any hazard
- To follow the installation manual for specific hardware product
- To follow standard safety procedures while installing
- To know installation procedures given in the manuals
- To operate hardware equipment in CCTV system
- To Know safety rules, policies and procedures –To Know quality standards to be followed
- To use other specific devices for installation of camera
- To improve work processes
- To ensure that only quality hardware products are procured complying to industry and quality standards
- To ensure product installation and user manual is available which should be given to the user or customer
- To ensure that there are no cable joins, sharp bends during cabling
- To ensure weather proof (UV proof) cable are used in outdoors
- To ensure that cabling is sturdy, protected and does not disturb the ambience of building
- To ensure that cameras are protected from light while installing in outdoor
- To ensure the intended area is covered during movement in case of tilt or pan type of camera
- To assess power requirement of camera and use required power
