

Influence of Zn-Zr substitution on the crystal chemistry and magnetic properties of CoFe₂O₄ nanoparticles synthesized by sol-gel method

Name of Faculty: S. S. Desai

Other Authors: · Sagar E. Shirsath, S. M. Patange

Date of Published paper: 26-07-2020

Academic Year: 2020-2021

The screenshot shows the ScienceDirect article page. The article title is "Influence of Zn-Zr substitution on the crystal chemistry and magnetic properties of CoFe₂O₄ nanoparticles synthesized by sol-gel method". The journal is "Physica B: Condensed Matter", Volume 596, 1 November 2020, 412400. The authors listed are S.S. Desai, Sagar E. Shirsath, Khalid M. Jassam Batoo, Syed Farooq Adil, Mujeeb Khan, and S.M. Patange. The page includes an outline, highlights, abstract, keywords, and a list of references. There are also options to view the PDF, purchase the PDF, and access through Dr. Vithalrao Vikhe Patil. The page is viewed by 5 people.

The screenshot shows the Scopus Preview source details page for "Physica B: Condensed Matter". The page provides information about the journal, including its former part, Scopus coverage years (1984, from 1988 to Present), publisher (Elsevier), ISSN (0921-4526), and subject areas (Engineering: Electrical and Electronic Engineering, Physics and Astronomy: Condensed Matter Physics, Materials Science: Electronic, Optical and Magnetic Materials). The source type is listed as "Journal". The page also displays CiteScore 2021 (4.8), SJR 2021 (0.452), and SNIP 2021 (0.767). There are options to view all documents, set document alert, save to source list, and source homepage.
