

Power Loss Minimization in Real Time Radial Distribution System with Sizing and Placement of DG using Ant Lion Optimization.

Name of Faculty: S. A. Markad,

Other authors: Archana G. Thosar,

Date of Publication: - 11/11/2021

Academic Year of Publication 2021-22.

The screenshot shows the article page on the Design Engineering (Toronto) website. The article title is "Power Loss Minimization in Real Time Radial Distribution System with Sizing and Placement of DG using Ant Lion Optimization" by Satish A. Markad and Archana G. Thosar. The abstract discusses the challenges of installing a centralized power station and the importance of Distributed Generation (DG) in meeting the growing demand for electricity. The page includes a PDF download button, a "How to Cite" section with the full citation, and a sidebar with contact information and download links.

Power Loss Minimization in Real Time Radial Distribution System with Sizing and Placement of DG using Ant Lion Optimization

Satish A. Markad, Archana G. Thosar

Keywords: Distributed Generation, Load Model, Ant Lion Optimization, Loss Reduction

ABSTRACT

There are more problems with the installation of a new centralized power station than the DG installation. This is why in recent years, the Distribution Generation (DG) has gained more importance to fulfill the increased demand of electrical energy in a distributed system. The location and size of this DG have a significant impact on the distribution
